ORDNANCE SURVEY OF SCOTLAND

PARISH OF KILMARTIN

(Part of)

ARGYLLSHIRE

INDEX TO THE SHEETS

EXPLANATORY REMARKS.

The scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, which is very approximately equal to one square inch to one acre, the square of 1·0018 inch being equal to one acre.

The length of each sheet is $1\frac{1}{2}$ miles, and the width 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces (f) on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The following are the characters employed on the Ordnance Plans on the Scales of 1–2500, and 6 inches to a mile :—

County Names	C	Hundreds or Wards	W
Parishes	P	Townships	T
Extra Parochial	E	Division of Townships	T

Antiquities ..... ROMAN / Druidical or Saxon / Norman or Subsequent

The descriptions of the boundaries are shown by the following initials :—

Centre of Stream	*C.S.*	Centre of Fence	*C.F.*
Centre of Road	*C.R.*	Top of Cop	*T.C.*
Side of Stream or Drain	*S.S.* or *S.D.*	Centre of Wall	*C.W.*
Root of Hedge	*R.H.*	Defaced	*Def.*
Face of Wall	*F.W.*	Track of Stream	*T.S.*

Undefined ..... *Und.*

Where a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

EXPLANATORY REMARKS.

The scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, which is very approximately equal to one square inch to one acre, the square of 1·0018 inch being equal to one acre.

The length of each sheet is $1\frac{1}{2}$ miles, and the width 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces ($\int$) on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The following are the characters employed on the Ordnance Plans on the Scales of 1–2500, and 6 inches to a mile :—

County Names	C	Hundreds or Wards	W
Parishes	P	Townships	T
Extra Parochial	E	Division of Townships	T

Antiquities ..... ROMAN / Druidical or Saxon / Norman or Subsequent

The descriptions of the boundaries are shown by the following initials :—

Centre of Stream	*C.S.*	Centre of Fence	*C.F.*
Centre of Road	*C.R.*	Top of Cop	*T.C.*
Side of Stream or Drain	*S.S.* or *S.D.*	Centre of Wall	*C.W.*
Root of Hedge	*R.H.*	Defaced	*Def.*
Face of Wall	*F.W.*	Track of Stream	*T.S.*

Undefined ..... *Und.*

Where a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

EXPLANATORY REMARKS.

The scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, which is very approximately equal to one square inch to one acre, the square of 1·0018 inch being equal to one acre.

The length of each sheet is $1\frac{1}{2}$ miles, and the width 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces (f) on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The following are the characters employed on the Ordnance Plans on the Scales of 1–2500, and 6 inches to a mile :—

County Names	C	Hundreds or Wards	W
Parishes	P	Townships	T
Extra Parochial	E	Division of Townships	T

Antiquities ..... ROMAN / Druidical or Saxon / Norman or Subsequent

The descriptions of the boundaries are shown by the following initials :—

Centre of Stream	*C.S.*	Centre of Fence	*C.F.*
Centre of Road	*C.R.*	Top of Cop	*T.C.*
Side of Stream or Drain	*S.S.* or *S.D.*	Centre of Wall	*C.W.*
Root of Hedge	*R.H.*	Defaced	*Def.*
Face of Wall	*F.W.*	Track of Stream	*T.S.*

Undefined ..... *Und.*

Where a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

ORDNANCE SURVEY OF SCOTLAND.

BOOK OF REFERENCE TO THE PLAN

OF THE

PARISH OF KILMONIVAIG,

IN THE

COUNTY OF INVERNESS,

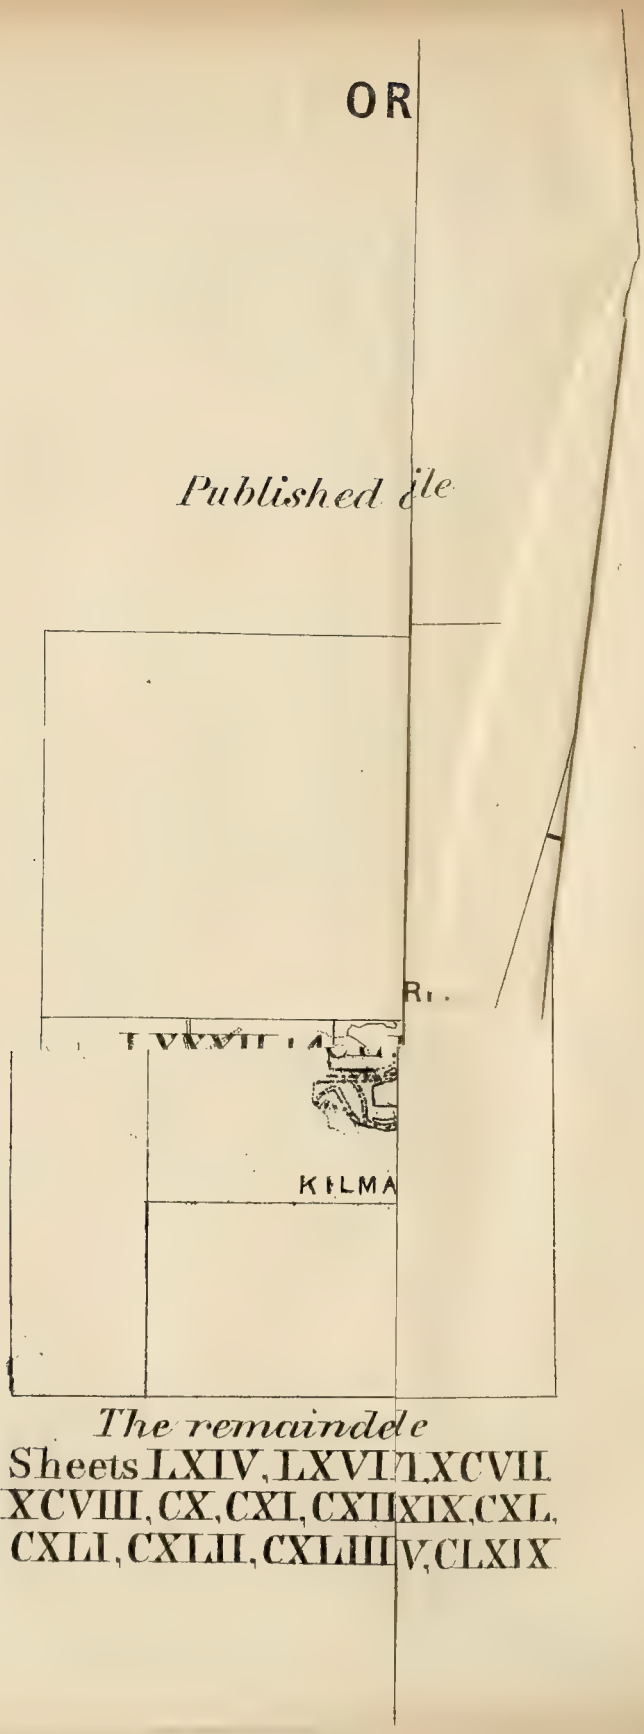
CONTAINING 276673·516 ACRES.

MAJOR-GENERAL JOHN CAMERON, C.B., R.E., F.R.S.,
DIRECTOR-GENERAL OF THE ORDNANCE SURVEY.

PRINTED AT THE ORDNANCE SURVEY OFFICE, SOUTHAMPTON.

1877.

Price One Shilling and Sixpence.



The remainde

Sheets LXIV, LXVII, XCVII, XCVIII, CX, CXI, CXII, XIX, CXL, CXLI, CXLII, CXLIII, V, CLXIX

EXPLANATORY REMARKS.

The scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, which is very approximately equal to one square inch to one acre, the square of 1·0018 inch being equal to one acre.

The length of each sheet is $1\frac{1}{2}$ miles, and the width 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces (ʃ) on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The dimensions of the sheets on the Six-inch scale being four miles by six miles, the area is twenty-four square miles, equal to 15,360 acres.

The following are the characters employed on the Ordnance Plans on the Scales of 1–2500, and 6 inches to a mile :—

County Names	C	Hundreds or Wards	W
Parishes	P	Townships	T
Extra Parochial	E	Division of Townships	T

Antiquities ..... ROMAN / Druidical or Saxon / Norman or Subsequent

The descriptions of the boundaries are shown by the following initials :—

Centre of Stream	*C.S.*	Centre of Fence	*C.F.*
Centre of Road	*C.R.*	Top of Cop	*T.C.*
Side of Stream or Drain	*S.S.* or *S.D.*	Centre of Wall	*C.W.*
Root of Hedge	*R.H.*	Defaced	*Def.*
Face of Wall	*F.W.*	Track of Stream	*T.S.*
Undefined	*Und.*		

Where a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

EXPLANATORY REMARKS.

The Scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, which is very approximately equal to one square inch to one acre, the square of 1·0018 inch being equal to one acre.

The length of each sheet is one and a-half miles, and the width one mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces [ʃ] on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus —31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is, therefore, a double reference number to each sheet as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The following are the characters employed on the Ordnance Plans on the Scales of 1-2500 and 6 inches to a mile:—

County Names	C	Hundreds or Wards	W
Parishes	P	Townships	T
Extra Parochial	E	Division of Townships	T

Antiquities ..... ROMAN / Druidical or Saxon / Norman or Subsequent

The descriptions of the boundaries are shown by the following initials:—

Centre of Stream	*C.S.*	Centre of Fence	*C.F.*
Centre of Road	*C.R.*	Top of Cop	*T.C.*
Side of Stream or Drain	*S.S.* or *S.D.*	Centre of Wall	*C.W.*
Root of Hedge	*R.H.*	Defaced	*Def.*
Face of Wall	*F.W.*	Track of Stream	*T.S.*

Undefined ..... *Und.*

Where a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

TABLE

FOR CONVERTING DECIMAL PARTS OF AN ACRE INTO ROODS AND PERCHES

ORDNANCE SURVEY OF SCOTLAND

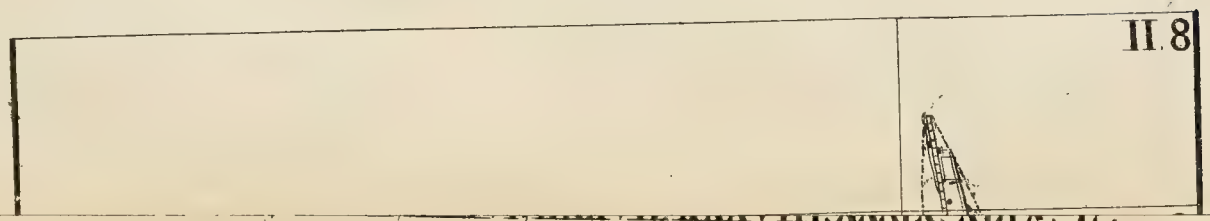
PARISH OF KILMORACK & Do. *(Det.)*

INVERNESS-SHIRE

INDEX TO THE SHEETS

Published on the Scale of $\frac{1}{2500}$ *or 25·344 Inches to a Mile*

Scale of this Index One Inch to a Mile.



EXPLANATORY REMARKS.

The scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, which is very approximately equal to one square inch to one acre, the square of 1·0018 inch being equal to one acre.

The length of each sheet is $1\frac{1}{2}$ miles, and the width 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces ($\int$) on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The dimensions of the sheets on the Six-inch scale being four miles by six miles, the area is twenty-four square miles, equal to 15,360 acres.

The following are the characters employed on the Ordnance Plans on the Scale of 1–2500, and 6 inches to a mile :—

County Names	C	Hundreds or Wards	W
Parishes	P	Townships	T
Extra Parochial	E	Division of Townships	T

Antiquities ..... ROMAN / Druidical or Saxon / Norman or Subsequent

The descriptions of the boundaries are shown by the following initials :—

Centre of Stream	*C.S.*	Centre of Fence	*C.F.*
Centre of Road	*C.R.*	Top of Cop	*T.C.*
Side of Stream or Drain	*S.S.* or *S.D.*	Centre of Wall	*C.W.*
Root of Hedge	*R.H.*	Defaced	*Def.*
Face of Wall	*F.W.*	Track of Stream	*T.S.*

Undefined ..... *Und.*

Where a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

Examples—

A.	R.	P.	Acres.	A.	R.	P.	Acres.

EXPLANATORY REMARKS.

The Scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile,* which is very approximately equal to one square inch to one acre, the square of 1·0018 inch being equal to one acre.

The length of each sheet is one and a-half miles, and the width one mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces [ʃ] on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus —31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is, therefore, a double reference number to each sheet as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The following are the characters employed on the Ordnance Plans on the Scales of 1-2500 and 6 inches to a mile:—

County Names	C	Hundreds or Wards	W
Parishes	P	Townships	*T*
Extra Parochial	E	Division of Townships	*T*

Antiquities ..... { ROMAN / Druidical or Saxon / Norman or Subsequent

The descriptions of the boundaries are shown by the following initials:—

Centre of Stream	*C.S.*	Centre of Fence	*C.F.*
Centre of Road	*C.R.*	Top of Cop	*T.C.*
Side of Stream or Drain ..	*S.S.* or *S.D.*	Centre of Wall	*C.W.*
Root of Hedge	*R.H.*	Defaced	*Def.*
Face of Wall	*F.W.*	Track of Stream	*T.S.*

Undefined ..... *Und.*

Where a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

* Or 3·157 chains to an inch.

ORDAND

PARHUR

Publi a Mile

d in 5 Sheets at 2

s only included in the s

EXPLANATORY REMARKS.

The scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, which is very approximately equal to one square inch to one acre, the square of 1·0018 inch being equal to one acre.

The length of each sheet is $1\frac{1}{2}$ miles, and the width 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces (f) on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The following are the characters employed on the Ordnance Plans on the Scales of 1–2500, and 6 inches to a mile :—

County Names	C	Hundreds or Wards	W
Parishes	P	Townships	T
Extra Parochial	E	Division of Townships	T

Antiquities ..... ROMAN / Druidical or Saxon / Norman or Subsequent

The descriptions of the boundaries are shown by the following initials :—

Centre of Stream	*C.S.*	Centre of Fence	*C.F.*
Centre of Road	*C.R.*	Top of Cop	*T.C.*
Side of Stream or Drain	*S.S.* or *S.D.*	Centre of Wall	*C.W.*
Root of Hedge	*R.H.*	Defaced	*Def.*
Face of Wall	*F.W.*	Track of Stream	*T.S.*

Undefined ..... *Und.*

Where a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place

* Or 3·157 chains to an inch.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

EXPLANATORY REMARKS.

EXPLANATORY REMARKS.

The scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, which is very approximately equal to one square inch to one acre, the square of 1·0018 inch being equal to one acre.

The length of each sheet is $1\frac{1}{2}$ miles, and the width 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces (f) on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The following are the characters employed on the Ordnance Plans on the Scales of 1–2500, and 6 inches to a mile :—

County Names	C	Hundreds or Wards	W
Parishes	P	Townships	T
Extra Parochial	E	Division of Townships	T

Antiquities ..... ROMAN / Druidical or Saxon / Norman or Subsequent

The descriptions of the boundaries are shown by the following initials :—

Centre of Stream	*C.S.*	Centre of Fence	*C.F.*
Centre of Road	*C.R.*	Top of Cop	*T.C.*
Side of Stream or Drain	*S.S.* or *S.D.*	Centre of Wall	*C.W.*
Root of Hedge	*R.H.*	Defaced	*Def.*
Face of Wall	*F.W.*	Track of Stream	*T.S.*

Undefined ..... *Und.*

Where a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

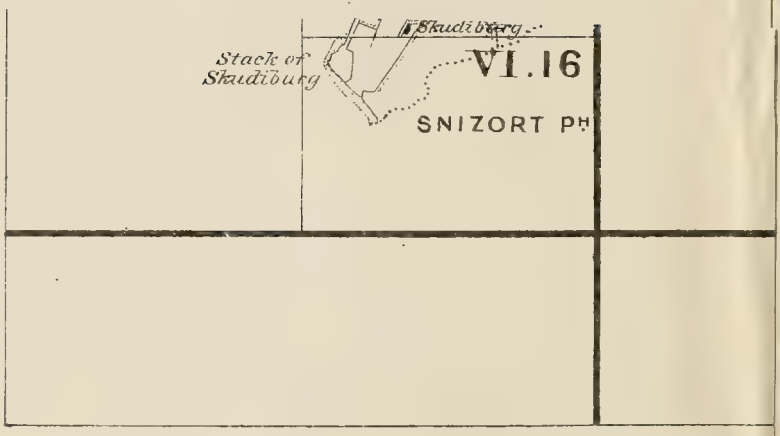
OR



The $\frac{1}{2500}$ scale Survey

EXPLANATORY REMARKS

The scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, which is very approximately equal to one square inch to one acre, the square of 1·0018 inch being equal to one acre.

The length of each sheet is $1\frac{1}{2}$ miles, and the width 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces ($\int$) on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The dimensions of the sheets on the Six-inch scale being four miles by six miles, the area is twenty-four square miles, equal to 15,360 acres.

The following are the characters employed on the Ordnance Plans on the Scales of 1–2500, and 6 inches to a mile :—

County Names	C	Hundreds or Wards	W
Parishes	P	Townships	T
Extra Parochial	E	Division of Townships	T

Antiquities ..... ROMAN / Druidical or Saxon / Norman or Subsequent

The descriptions of the boundaries are shown by the following initials :—

Centre of Stream	*C.S.*	Centre of Fence	*C.F.*
Centre of Road	*C.R.*	Top of Cop	*T.C.*
Side of Stream or Drain	*S.S.* or *S.D.*	Centre of Wall	*C.W.*
Root of Hedge	*R.H.*	Defaced	*Def.*
Face of Wall	*F.W.*	Track of Stream	*T.S.*

Undefined ..... *Und.*

Where a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

ORDNANCE SURVEY OF SCOTLAND

PARISH OF KILMUIR EASTER

ROSS-SHIRE & CROMARTYSHIRE *(Det. Nos 8 & 9)*

INDEX TO THE SHEETS

Published on the Scale of $\frac{1}{2500}$ *or 25·344 Inches to a Mile*

Scale of this Index One Inch to a Mile.

EDDERTON Pt

Cnoc an . XLI. 13.

EXPLANATORY REMARKS.

The scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, which is very approximately equal to one square inch to one acre, the square of 1·0018 inch being equal to one acre.

The length of each sheet is $1\frac{1}{2}$ miles, and the width 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces ($\int$) on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The dimensions of the sheets on the Six-inch scale being four miles by six miles the area is twenty-four square miles, equal to 15,360 acres.

The following are the characters employed on the Ordnance Plans on the Scales of 1-2500, and 6 inches to a mile :—

County Names	C	Hundreds or Wards	W
Parishes	P	Townships	T
Extra Parochial	E	Division of Townships	T

Antiquities ..... ROMAN / Druidical or Saxon / Norman or Subsequent

The descriptions of the boundaries are shown by the following initials :—

Centre of Stream	*C.S.*	Centre of Fence	*C.F.*
Centre of Road	*C.R.*	Top of Cop	*T.C.*
Side of Stream or Drain	*S.S.* or *S.D.*	Centre of Wall	*C.W.*
Root of Hedge	*R.H.*	Defaced	*Def.*
Face of Wall	*F.W.*	Track of Stream	*T.S.*

Undefined ..... *Und.*

Where a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

Examples—

A.	R.	P.	Acres.	A.	R.	P.	Acres.

ORDNANCE SURVEY OF SCOTLAND

PARISH OF KILMUIR EASTER

ROSS-SHIRE & CROMARTYSHIRE *(Det. Nos 8 & 9)*

INDEX TO THE SHEETS

Published on the Scale of $\frac{1}{2500}$ *or 25·344 Inches to a Mile*

Scale of this Index One Inch to a Mile.

EXPLANATORY REMARKS.

The scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, which is very approximately equal to one square inch to one acre, the square of 1·0018 inch being equal to one acre.

The length of each sheet is 1½ miles, and the width 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces ($\int$) on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The dimensions of the sheets on the Six-inch scale being four miles by six miles, the area is twenty-four square miles, equal to 15,360 acres.

The following are the characters employed on the Ordnance Plans on the Scales of 1–2500, and 6 inches to a mile :—

County Names	C	Hundreds or Wards	W
Parishes	P	Townships	T
Extra Parochial	E	Division of Townships	T

Antiquities ..... ROMAN / Druidical or Saxon / Norman or Subsequent

The descriptions of the boundaries are shown by the following initials :—

Centre of Stream	*C.S.*	Centre of Fence	*C.F.*
Centre of Road	*C.R.*	Top of Cop	*T.C.*
Side of Stream or Drain	*S.S.* or *S.D.*	Centre of Wall	*C.W.*
Root of Hedge	*R.H.*	Defaced	*Def.*
Face of Wall	*F.W.*	Track of Stream	*T.S.*
Undefined	*Und.*		

Where a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

ORDNANCE SURVEY OF SCOTLAND

PARISH OF KILMUIR WESTER AND SUDDIE & KILLEARNAN Pⁿ (*Del*)

ROSS-SHIRE

INDEX TO THE SHEETS

Published on the Scale of $\frac{1}{2500}$ *or 25·344 Inches to a Mile*

Scale of this Index One Inch to a Mile

EXPLANATORY REMARKS.

The scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, which is very approximately equal to one square inch to one acre, the square of 1·0018 inch being equal to one acre.

The length of each sheet is $1\frac{1}{2}$ miles, and the width 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces (*f*) on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The following are the characters employed on the Ordnance Plans on the Scales of 1–2500, and 6 inches to a mile :—

County Names	C	Hundreds or Wards	W
Parishes	P	Townships	T
Extra Parochial	E	Division of Townships	T

Antiquities ..... { ROMAN / Druidical or Saxon / Norman or Subsequent

The descriptions of the boundaries are shown by the following initials :—

Centre of Stream	*C.S.*	Centre of Fence	*C.F.*
Centre of Road	*C.R.*	Top of Cop	*T.C.*
Side of Stream or Drain ...	*S.S.* or *S.D.*	Centre of Wall	*C.W.*
Root of Hedge	*R.H.*	Defaced	*Def.*
Face of Wall	*F.W.*	Track of Stream	*T.S.*

Undefined ..... *Und.*

Where a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

EXPLANATORY REMARKS.

The scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, which is very approximately equal to one square inch to one acre, the square of 1·0018 inch being equal to one acre.

The length of each sheet is $1\frac{1}{2}$ miles, and the width 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces ($\int$) on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The following are the characters employed on the Ordnance Plans on the Scales of 1–2500, and 6 inches to a mile :—

County Names	C	Hundreds or Wards	W
Parishes	P	Townships	T
Extra Parochial	E	Division of Townships	T

Antiquities ..... ROMAN / Druidical or Saxon / Norman or Subsequent

The descriptions of the boundaries are shown by the following initials :—

Centre of Stream	*C.S.*	Centre of Fence	*C.F.*
Centre of Road	*C.R.*	Top of Cop	*T.C.*
Side of Stream or Drain	*S.S.* or *S.D.*	Centre of Wall	*C.W.*
Root of Hedge	*R.H.*	Defaced	*Def.*
Face of Wall	*F.W.*	Track of Stream	*T.S.*

Undefined ..... *Und.*

Where a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

The

EXPLANATORY REMARKS.

The scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile,* which is very approximately equal to one square inch to one acre, the square of 1·0018 inch being equal to one acre.

The length of each sheet is 1½ miles, and the width 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces (ʃ) on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The following are the characters employed on the Ordnance Plans on the Scales of 1–2500, and 6 inches to a mile :—

County Names	C	Hundreds or Wards	W
Parishes	P	Townships	T
Extra Parochial	E	Division of Townships	T

Antiquities ..... { ROMAN / Druidical or Saxon / Norman or Subsequent

The descriptions of the boundaries are shown by the following initials :—

Centre of Stream	*C.S.*	Centre of Fence	*C.F.*
Centre of Road	*C.R.*	Top of Cop	*T.C.*
Side of Stream or Drain	*S.S.* or *S.D.*	Centre of Wall	*C.W.*
Root of Hedge	*R.H.*	Defaced	*Def.*
Face of Wall	*F.W.*	Track of Stream	*T.S.*

Undefined ..... *Und.*

Where a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place

* Or 3·157 chains to an inch.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

EXPLANATORY REMARKS.

The Scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, which is very approximately equal to one square inch to one acre, the square of 1·0018 inch being equal to one acre.

The length of each sheet is $1\frac{1}{2}$ miles, and the width 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces [⌒] on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus —31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The numbers of the adjoining plans are printed on the margin of this plan.

The dimensions of the sheets on the Six-inch scale being four miles by six miles, the area is twenty-four square miles, equal to 15,360 acres.

The following are the characters employed on the Ordnance Plans on the Scales of 1–2500, and 6 inches to a mile :—

County Names	C	Hundreds or Wards	W
Parishes	P	Townships	T
Extra Parochial	E	Division of Townships	T

Antiquities ..... ROMAN / Druidical or Saxon / Norman or Subsequent

The descriptions of the boundaries are shown by the following initials :—

Centre of Stream	*C.S.*	Centre of Fence	*C.F.*
Centre of Road	*C.R.*	Top of Cop	*T.C.*
Side of Stream or Drain ...	*S.S.* or *S.D.*	Centre of Wall	*C.W.*
Root of Hedge	*R.H.*	Defaced	*Def.*
Face of Wall	*F.W.*	Track of Stream.....	*T.S.*

Undefined..... *Und.*

Where a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

N.B.—The areas are computed to the centre of fence, or other boundary of enclosure, except in the following cases :—

(1.) When the fence or other boundary is also the boundary of a Parish or other Civil Division, which does not follow the centre of the fence, the area is calculated to the Parish or other boundary, and not to the centre.

(2.) The fences, &c., bounding either side of a railway are included wholly within its area.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

ORDNANCE SURVEY OF SCOTLAND

PARISH OF KILNINVER & KILMELFORT

EXPLANATORY REMARKS.

The scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, which is very approximately equal to one square inch to one acre, the square of 1·0018 inch being equal to one acre.

The length of each sheet is $1\frac{1}{2}$ miles, and the width 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces ($\int$) on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The dimensions of the sheets on the Six-inch scale being four miles by six miles, the area is twenty-four square miles, equal to 15,360 acres.

The following are the characters employed on the Ordnance Plans on the Scale of 1–2500, and 6 inches to a mile :—

County Names	C	Hundreds or Wards	W
Parishes	P	Townships	T
Extra Parochial	E	Division of Townships	T

Antiquities ..... { ROMAN / Druidical or Saxon / Norman or Subsequent

The descriptions of the boundaries are shown by the following initials :—

Centre of Stream	*C.S.*	Centre of Fence	*C.F.*
Centre of Road	*C.R.*	Top of Cop	*T.C.*
Side of Stream or Drain ...	*S.S.* or *S.D.*	Centre of Wall	*C.W.*
Root of Hedge	*R.H.*	Defaced	*Def.*
Face of Wall	*F.W.*	Track of Stream	*T.S.*

Undefined ..... *Und.*

Where a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

Examples—

EXPLANATORY REMARKS.

The Scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, which is very approximately equal to one square inch to one acre, the square of 1·0018 inch being equal to one acre.

The length of each sheet is one and a-half miles, and the width one mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces [ʃ] on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus —31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is, therefore, a double reference number to each sheet as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The following are the characters employed on the Ordnance Plans on the Scales of 1·2500 and 6 inches to a mile:—

County Names	C	Hundreds or Wards	W
Parishes	P	Townships	T
Extra Parochial	E	Division of Townships	T

Antiquities ..... ROMAN / Druidical or Saxon / Norman or Subsequent

The descriptions of the boundaries are snown by the following initials:—

Centre of Stream	*C.S.*	Centre of Fence	*C.F.*
Centre of Road	*C.R.*	Top of Cop	*T.C.*
Side of Stream or Drain ..	*S.S.* or *S.D.*	Centre of Wall	*C.W.*
Root of Hedge	*R.H.*	Defaced	*Def.*
Face of Wall	*F.W.*	Track of Stream	*T.S.*

Undefined ..... *Und.*

Where a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

EXPLANATORY REMARKS.

The Scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, which is very approximately equal to one square inch to one acre, the square of 1·0018 inch being equal to one acre.

The length of each sheet is 1½ miles, and the width 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces (ʃ) on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The following are the characters employed on the Ordnance Plans on the Scales of 1-2500, and 6 inches to a mile:—

County Names	C	Hundreds or Wards	W
Parishes	P	Townships	T
Extra Parochial	E	Division of Townships	T

Antiquities ..... ROMAN / Druidical or Saxon / Norman or Subsequent

The descriptions of the boundaries are shewn by the following initials:—

Centre of Stream	*C. S.*	Centre of Fence	*C. F.*
Centre of Road	*C. R.*	Top of Cop	*T. C.*
Side of Stream or Drain	*S. S.* or *S. D.*	Centre of Wall	*C. W.*
Root of Hedge	*R. H.*	Defaced	*Def.*
Face of Wall	*F. W.*	Track of Stream	*T. S.*
Undefined	*Und.*		

Where a change occurs in the boundaries, the symbol [o—o] is used to shew the part at which the change takes place.

Where a change occurs — the
part at which the change takes place.

EXPLANATORY REMARKS.

The Scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, which is very approximately equal to one square inch to one acre, the square of 1·0018 inch being equal to one acre.

The length of each sheet is one and a-half miles, and the width one mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces [ʃ] on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus —31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is, therefore, a double reference number to each sheet as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The following are the characters employed on the Ordnance Plans on the Scales of 1·2500 and 6 inches to a mile:—

County Names	C	Hundreds or Wards	W
Parishes	P	Townships	T
Extra Parochial	E	Division of Townships	T

Antiquities ..... ROMAN / Druidical or Saxon / Norman or Subsequent

The descriptions of the boundaries are shown by the following initials:—

Centre of Stream	*C.S.*	Centre of Fence	*C.F.*
Centre of Road	*C.R.*	Top of Cop	*T.C.*
Side of Stream or Drain ..	*S.S.* or *S.D.*	Centre of Wall	*C.W.*
Root of Hedge	*R.H.*	Defaced	*Def.*
Face of Wall	*F.W.*	Track of Stream	*T.S.*

Undefined ..... *Und.*

Where a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

TABLE

Wetlands	LXXXVII.	13	A dwelling house.
Whitemyre	,,	9	A small farmsteading.

ORDNANCE SURVEY OF SCOTLAND.

BOOK OF REFERENCE TO THE PLAN

OF THE

PARISH OF KILSYTH,

IN THE

COUNTY OF STIRLING,

CONTAINING 13248·558 ACRES.

COLONEL SIR HENRY JAMES, R.E., F.R.S., F.G.S., &c.

SUPERINTENDENT OF THE ORDNANCE SURVEY

PRINTED AT THE ORDNANCE SURVEY OFFICE, SOUTHAMPTON.

1862.

Price Two Shillings and Sixpence.

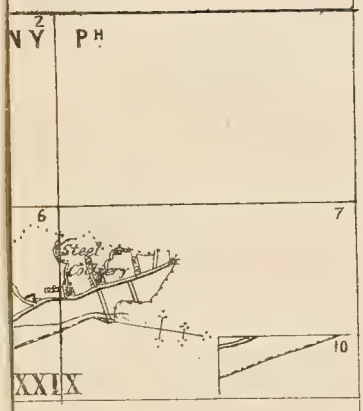
OF KILSYTH

LINGSHIRE

THE SHEETS

le of $\frac{1}{2500}$ or 25·344 Inches to a Mile

dex 1 Inch to a Mile.



EXPLANATORY REMARKS.

The Scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, which is very approximately equal to one square inch to one acre, the square of 1·0018 inch being equal to one acre.

The length of each sheet is 1½ miles, and the width 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces (*f*) on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The following are the characters employed on the Ordnance Plans on the Scales of 1-2500, and 6 inches to a mile:—

County Names	C	Hundreds or Wards	W
Parishes	P	Townships	*T*
Extra Parochial	E	Division of Townships	*T*

Antiquities ..... ROMAN / Druidical or Saxon / Norman or Subsequent

The descriptions of the boundaries are shewn by the following initials:—

Centre of Stream	*C. S.*	Centre of Fence	*C. F.*
Centre of Road	*C. R.*	Top of Cop	*T. C.*
Side of Stream or Drain	*S. S.* or *S. D.*	Centre of Wall	*C. W.*
Root of Hedge	*R. H.*	Defaced	*Def.*
Face of Wall	*F. W.*	Track of Stream	*T. S.*

Undefined ..... *Und.*

Where a change occurs in the boundaries, the symbol [o—o] is used to shew the part at which the change takes place.

The remainder of this

EXPLANATORY REMARKS.

The scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, which is very approximately equal to one square inch to one acre, the square of 1·0018 inch being equal to one acre.

The length of each sheet is $1\frac{1}{2}$ miles, and the width 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces ($\int$) on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The following are the characters employed on the Ordnance Plans on the Scales of 1–2500, and 6 inches to a mile :—

County Names	C	Hundreds or Wards	W
Parishes	P	Townships	T
Extra Parochial	E	Division of Townships	T

Antiquities ..... ROMAN / Druidical or Saxon / Norman or Subsequent

The descriptions of the boundaries are shown by the following initials :—

Centre of Stream	*C.S.*	Centre of Fence	*C.F.*
Centre of Road	*C.R.*	Top of Cop	*T.C.*
Side of Stream or Drain	*S.S.* or *S.D.*	Centre of Wall	*C.W.*
Root of Hedge	*R.H.*	Defaced	*Def.*
Face of Wall	*F.W.*	Track of Stream	*T.S.*

Undefined ..... *Und.*

Where a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

EXPLANATORY REMARKS.

The scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, which is very approximately equal to one square inch to one acre, the square of 1·0018 inch being equal to one acre.

The length of each sheet is 1½ miles, and the width 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces ($\int$) on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The dimensions of the sheets on the Six-inch scale being four miles by six miles, the area is twenty-four square miles, equal to 15,360 acres.

The following are the characters employed on the Ordnance Plans on the Scales of 1-2500, and 6 inches to a mile :—

County Names	C	Hundreds or Wards	W
Parishes	P	Townships	T
Extra Parochial	E	Division of Townships	T

Antiquities ..... ROMAN / Druidical or Saxon / Norman or Subsequent

The descriptions of the boundaries are shown by the following initials :—

Centre of Stream	*C.S.*	Centre of Fence	*C.F.*
Centre of Road	*C.R.*	Top of Cop	*T.C.*
Side of Stream or Drain ...	*S.S.* or *S.D.*	Centre of Wall	*C.W.*
Root of Hedge	*R.H.*	Defaced	*Def.*
Face of Wall	*F.W.*	Track of Stream	*T.S.*

Undefined ..... *Und.*

Where a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

ORDNANCE SURVEY OF SCOTLAND.

BOOK OF REFERENCE TO THE PLAN

OF THE

PARISH OF KINCARDINE,

IN THE

COUNTY OF PERTH.

CONTAINING 10659·434 ACRES.

COLONEL SIR HENRY JAMES, R.E., F.R.S., F.G.S., &c.,
SUPERINTENDENT OF THE ORDNANCE SURVEY.

PRINTED AT THE ORDNANCE SURVEY OFFICE, SOUTHAMPTON.

1864.

Price Two Shillings.

EXPLANATORY REMARKS.

The Scale of the Parish Plans is the 1-2500th of the actual length on the ground, nd is equal to 25·344 inches to a mile, which is very approximately equal to one quare inch to one acre, the square of 1·0018 inch being equal to one acre.

The length of each sheet is one and a-half miles, and the width one mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces [ʃ] on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus —31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is, therefore, a double reference number to each sheet as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The following are the characters employed on the Ordnance Plans on the Scales of 1·2500 and 6 inches to a mile:—

County Names	C	Hundreds or Wards	W
Parishes	P	Townships	T
Extra Parochial	E	Division of Townships	T

Antiquities ..... ROMAN / Druidical or Saxon / Norman or Subsequent

The descriptions of the boundaries are shown by the following initials:—

Centre of Stream	*C.S.*	Centre of Fence	*C.F.*
Centre of Road	*C.R.*	Top of Cop	*T.C.*
Side of Stream or Drain ..	*S.S.* or *S.D.*	Centre of Wall	*C.W.*
Root of Hedge	*R.H.*	Defaced	*Def.*
Face of Wall	*F.W.*	Track of Stream	*T.S.*

Undefined ..... *Und.*

Where a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

TABLE

FOR CONVERTING DECIMAL PARTS OF AN ACRE INTO ROODS AND PERCHES.

Perches.	0 Rood.	1 Rood.	2 Roods.	3 Roods.	Perches.	0 Rood.	1 Rood.	2 Roods.	3 Roods

ORDNANCE SURVEY OF SCOTLAND

PARISH OF KINCARDINE O'NEIL

ABERDEENSHIRE

INDEX TO THE SHEETS

Published on the Scale of $\frac{1}{2500}$ *or 25·344 Inches to a Mile*

Scale of this Index One Inch to a Mile

... 2/6 each - with 1 Book of Areas, at 3/6

EXPLANATORY REMARKS.

The scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, which is very approximately equal to one square inch to one acre, the square of 1·0018 inch being equal to one acre.

The length of each sheet is $1\frac{1}{2}$ miles, and the width 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces ($\int$) on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The following are the characters employed on the Ordnance Plans on the Scales of 1–2500, and 6 inches to a mile :—

County Names	C	Hundreds or Wards	W
Parishes	P	Townships	T
Extra Parochial.....	E	Division of Townships	T

Antiquities ..... { ROMAN / Druidical or Saxon / Norman or Subsequent

The descriptions of the boundaries are shown by the following initials :—

Centre of Stream	*C.S.*	Centre of Fence	*C.F.*
Centre of Road	*C.R.*	Top of Cop	*T.C.*
Side of Stream or Drain ...	*S.S.* or *S.D.*	Centre of Wall	*C.W.*
Root of Hedge	*R.H.*	Defaced	*Def.*
Face of Wall.....	*F.W.*	Track of Stream.....	*T.S.*

Undefined..... *Und.*

Where a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

Examples—

	Acres.		Acres.

(Det N° II)

EXPLANATORY REMARKS.

The scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, or 3·157 chains to an inch, which is very approximately equal to one square inch to one acre, the square of 1·0018 inch being equal to one acre.

The length of each sheet is $1\frac{1}{2}$ miles, and the width 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces (ʃ) on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The dimensions of the sheets on the Six-inch scale being four miles by six miles, the area is twenty-four square miles, equal to 15,360 acres.

The following are the characters employed on the Ordnance Plans on the Scales of 1–2500, and 6 inches to a mile :—

County Names	C	Hundreds or Wards	W
Parishes	P	Townships	T
Extra Parochial	E	Division of Townships	T

Antiquities ..... ROMAN / Druidical or Saxon / Norman or Subsequent

The descriptions of the boundaries are shown by the following initials :—

Centre of Stream	*C.S.*	Centre of Fence	*C.F.*
Centre of Road	*C.R.*	Top of Cop	*T.C.*
Side of Stream or Drain	*S.S.* or *S.D.*	Centre of Wall	*C.W.*
Root of Hedge	*R.H.*	Defaced	*Def.*
Face of Wall	*F.W.*	Track of Stream	*T.S.*

Undefined ..... *Und.*

Where a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.

ORDNANCE SURVEY OF SCOTLAND

PARISH OF KINCLAVEN

PERTHSHIRE

INDEX TO THE SHEETS

EXPLANATORY REMARKS.

The scale of the Parish Plans is the 1-2500th of the actual length on the ground, and is equal to 25·344 inches to a mile, which is very approximately equal to one square inch to one acre, the square of 1·0018 inch being equal to one acre.

The length of each sheet is $1\frac{1}{2}$ miles, and the width 1 mile, the area of each sheet is therefore 960 acres.

Each enclosure has a reference number to the area which is given in this Book.

The Braces (f) on the plans are to indicate that the spaces so braced are included under the same reference number.

The Altitudes in feet above the Mean Level of the Sea are written thus—31·4.

The Scale of the Plans of the County is 6 inches to a mile, and each sheet contains the same area as 16 sheets of the Parish Plans. There is therefore a double reference number to each sheet, as VI. 9., the Roman Numerals referring to the County Plans, the Arabic Figures to the Parish Plans.

The following are the characters employed on the Ordnance Plans on the Scales of 1–2500, and 6 inches to a mile :—

County Names	C	Hundreds or Wards	W
Parishes	P	Townships	T
Extra Parochial	E	Division of Townships	T

Antiquities ..... ROMAN / Druidical or Saxon / Norman or Subsequent

The descriptions of the boundaries are shown by the following initials :—

Centre of Stream	*C.S.*	Centre of Fence	*C.F.*
Centre of Road	*C.R.*	Top of Cop	*T.C.*
Side of Stream or Drain	*S.S.* or *S.D.*	Centre of Wall	*C.W.*
Root of Hedge	*R.H.*	Defaced	*Def.*
Face of Wall	*F.W.*	Track of Stream	*T.S.*

Undefined ..... *Und.*

Where a change occurs in the boundaries, the symbol [o—o] is used to show the part at which the change takes place.

N.B.—To convert Decimal Fractions of an Acre into Roods and Perches, multiply the decimal first by 4 and then by 40, preserving the same number of decimals in the product.
